

Transaction Network Services

14 January 2008

**FORMER INTERNATIONAL HEAD OF AVANTRA JOINS TNS**

- ***TNS appoints Duncan Mortlock as International Business Development Director***

Transaction Network Services (NYSE:TNS) has appointed Duncan Mortlock as Business Development Director of its International Services Division (ISD). Mortlock will oversee the POS and ATM environments, for both retail and financial customers.

Mortlock brings with him extensive knowledge in the outsourcing, payments and services sector. He worked as Head of International Product Sales at VocaLink Ltd, International Head at Avantra, a trading division of LINK Interchange Network Ltd (LINK), and as Managed Services Director at NCR Corporation.

With experience in sales, negotiation and contract development, Mortlock has worked with some of the largest companies in the world. Mortlock has an impressive career history spanning the retail, financial and payments industry and has been directly involved in aspects of ATM and POS management, maintenance and support.

John Rowson, SVP Commercial & Business Development, who Mortlock will report to, comments, "Duncan brings great knowledge of the payment and services industry to TNS, as well as excellent negotiation and sales experience. His expertise in the international marketplace will be highly valued as TNS looks to further enhance its offering across Europe and Asia Pacific."

Mortlock comments, "I am delighted to be joining TNS and excited about the opportunity to share my knowledge and experience. TNS has an excellent reputation in the industry and I'm looking forward to help build its international offering and other new ventures along the way."

Duncan will work out of TNS' London office.

### **About TNS**

Transaction Network Services (TNS) is an international data communications company that enables payments, money and voices to move around the world.

TNS' mission is to enable the world to transact. It does this through a broad range of networking, data communications and value added services, which it provides to many of the world's leading retailers, banks/processors, telecommunications companies and financial markets.

Since its inception in 1990, TNS has designed and implemented multiple data networks, each designed specifically for the transport of transaction-oriented data. TNS' networks support a variety of widely accepted communications protocols and are designed to be scalable and accessible by multiple methods. Today, TNS has offices throughout the world serving customers in 28 countries with the ability to provide services in other countries.
