GPM INVESTMENTS SELECTS TNS SERVICES FOR 194 SITES

13 October 2008 - GPM Investments, LLC has selected Transaction Network Services (NYSE:TNS) to provide the FusionPoint solution for a total of 194 Fas Mart and Shore Stop convenience stores across the mid-Atlantic region.

GPM Investments, LLC is headquartered near Richmond, Virginia, and has 205 corporately owned stores and 145 independent dealers in Virginia, Maryland, Delaware, Connecticut, Rhode Island, Tennessee, New Jersey, Pennsylvania and North Carolina.

FusionPoint is a complete, end-to-end managed service offered by TNS that streamlines in-store networking and enables data from diverse store applications to flow through a single high speed broadband connection to a variety of end-points.

Barry Khrosrophanah, Vice President of Information Technology for GPM Investments, said: "We have been a TNS customer since 2005 and over the years we have continued to be impressed with the level of service provided. TNS' FusionPoint solution fits us because it allows our stores to run multiple applications through one secure connection.

"The main benefit for our stores is the faster transaction processing times we are able to get through the broadband connection as opposed to a dial-up connection, allowing business to run quickly and smoothly."

By taking advantage of FusionPoint, Fas Mart and Shore Stop not only simplify store communications but can also rely on the security and performance of the TNS PCI-DSS certified network and 24x7x365 helpdesk services with live real-time support. TNS also provides all necessary network components and communications hardware essential for this application.

Alan Schwartz, Executive Vice President, North America Sales at TNS, added: “We are pleased to have GPM Investments sign on for several more years of service. This reinforces that they have been happy with the quality of service TNS has provided over the years. GPM Investments is a valued customer and I look forward to watching this relationship grow in years to come. ”

About Transaction Network Services

Transaction Network Services (TNS) is an international data communications company that enables payments, money and voices, to move around the world.

TNS' mission is to enable the world to transact. It does this through a broad range of networking, communications and value added services, which it provides to many of the world's leading retailers, banks/processors, telecommunications companies and financial markets.

Since its inception in 1990, TNS has designed and implemented multiple data networks, each designed specifically for the transport of transaction-oriented data. TNS' networks support a variety of widely accepted communications protocols and are designed to be scalable and accessible by multiple methods. Today, TNS has offices throughout the world serving customers in 28 countries with the ability to provide services in other countries.
