NCIC SELECTS TNS FOR FRAUD AND VALIDATION SERVICES

19 June 2008- NCIC Inmate Telephone Services (NCIC) has selected Transaction Network Services (NYSE:TNS) to provide a full suite of fraud and validation solutions for its North American Network.

NCIC, founded in 1995, handles over 3 million inbound calls per month, making it one of the largest privately owned telephone service companies in the United States.

The organization will use TNS' billed number screening, fraud control, ID Plus (name and address look up) and credit card authorization and settlement services. This will support the telecom solutions NCIC provides to inmate facilities.

Bill Pope, President of NCIC, which has used other services from TNS for over 10 years, said: "We have been a TNS customer since 1997 and over the years have continued to be very impressed with TNS' reliable service and built-in redundancy.

"The main benefit of extending our relationship with TNS is to help manage risk. When a call is made, TNS verifies that the party being telephoned will accept a collect call and can be billed for it before it goes through. The TNS team gave us the confidence they could deliver at a high level of service, making them a natural choice for us."

Other benefits NCIC will enjoy include TNS' fraud control services and its 24x7x365 helpdesk services with live real-time support.

Pope said: "It is important to know that if there is ever a problem, a real live person will be there to assist us."

Tony DiCola, Director of Fraud and Validation for TNS, added: "We are thrilled to be partnering with NCIC. We pride ourselves in the high level of service we provide and the

varied technologies we offer to the telecommunications industry. Good fraud control is key to maintaining and promoting already tight profit margins. We can help organizations reduce potential exposure to loss when callers charge calls to credit, debit and pre-paid cards. The ability to screen incoming calls also helps to control costs by decreasing the number of unbillable events.”
