CAVALIER AWARDS NEW, EXPANDED SS7 SERVICES AGREEMENT TO TNS

14 October 2009 – Transaction Network Services (NYSE:TNS) has been selected by Cavalier, a leading provider of competitive telecommunications services throughout the eastern United States, to be its exclusive supplier of SS7 network and database services.

Cavalier is a full-service provider of reliable and efficient telecommunications solutions for business, consumer, and government customers. Using its owned and operated fiber optic network, the company serves hundreds of thousands of customers throughout the eastern United States.

Under this new, exclusive agreement TNS will provide Intelligent Network services, including Local Number Portability, and SS7 connectivity to power Cavalier's communications products.

"TNS has been a consistent, strategic telecommunications partner to Cavalier over the past several years. It made sense to expand our long-standing agreement to include all SS7-related services so that we can leverage one trusted relationship for our outsourced network solutions. TNS has the network, the scale, and service portfolio to accommodate our growing business," stated Jim Vermeulen, Executive Vice President of Operations for Cavalier.

TNS operates the largest, independent SS7 network in North America, providing similar services to over 700 telecommunications companies around the world. In addition, TNS has provided high-quality database services since 1995, including network-based CNAM using only data sourced directly from carriers, the definitive source for accuracy.

"We value the trust that Cavalier has instilled in TNS as a long-term provider of SS7 services. Our team is committed to maintaining this exclusive relationship and look

forward to their continued growth and outstanding level of service to their customers,” stated Michael Robinson, Executive Vice President and General Manager for TNS’ Telecommunication Services Division.

About Transaction Network Services

Transaction Network Services (TNS) is an international data communications company that enables payments, money and voices to move around the world.

TNS’ mission is to enable the world to transact. It does this through a broad range of networking, communications and value added services, which it provides to many of the world’s leading retailers, banks/processors, telecommunications companies and financial markets.

Since its inception in 1990, TNS has designed and implemented multiple data networks, each designed specifically for the transport of transaction-oriented data. TNS’ networks support a variety of widely accepted communications protocols and are designed to be scalable and accessible by multiple methods. Today, TNS has 32 offices across 28 countries with the ability to provide services in other countries.
