

TNSLink

Improve uptime, increase revenues, and decrease costs with a simple solution that reduces the complexity of POS, ATM and Kiosk communications

TNSLink is a fully managed, PCI-compliant communications solution for ATMs, POS terminals, and Kiosks that enables secure, high-speed transaction transport. There is no restriction on the type of equipment used, transaction volumes, or site requirements.

Features

- **Flexible connectivity** - works with dial, serial or IP terminals and supports wired and wireless broadband access methods
- **State-of-the-art technology** - utilizes state-of-the-art technology, offering broadband speed for the price of dial
- **Secure communications** - ensures secure transport, utilizing industry standard SSL and Virtual Private Network (VPN) with advanced encryption algorithms such as Triple DES
- **Service availability qualification** - ensures service availability by including pre-qualification analysis to determine broadband and/or wireless coverage
- **Multiple back-up options** - dial or wireless back-up is available for broadband customers to provide protection against down-time and service interruption
- **TNS Online portal** - web interface provides you with near real time status and visibility across your entire estate

Benefits

Maximize uptime - implementation of the solution is easy. TNSLink minimizes disruption at your site since there is no need to replace legacy devices or change payment processors. This means your equipment is back up and operating quickly. TNSLink has options for multiple back-up approaches that will enable your equipment to keep functioning if the primary method of connectivity becomes unavailable.

Reduced risk - TNSLink has multiple security features and utilizes the PCI DSS certified TNS backbone network, providing high speed, secure transaction transport. The security aspects of TNSLink are designed to help you defend against hackers and data theft attempts.

Visibility - The TNS Online Portal gives you the visibility you need to effectively monitor your payment operations. With near real time status and activity monitoring across your entire estate, you will have the control you need to proactively manage your payment device network.

Industry leading support - TNS provides you with help desk support 24x7x365. With a reputation built over nearly 20 years of experience in the payments industry, you can rely on TNS to provide you with the highest levels of support.

One Connection - A World of Opportunities

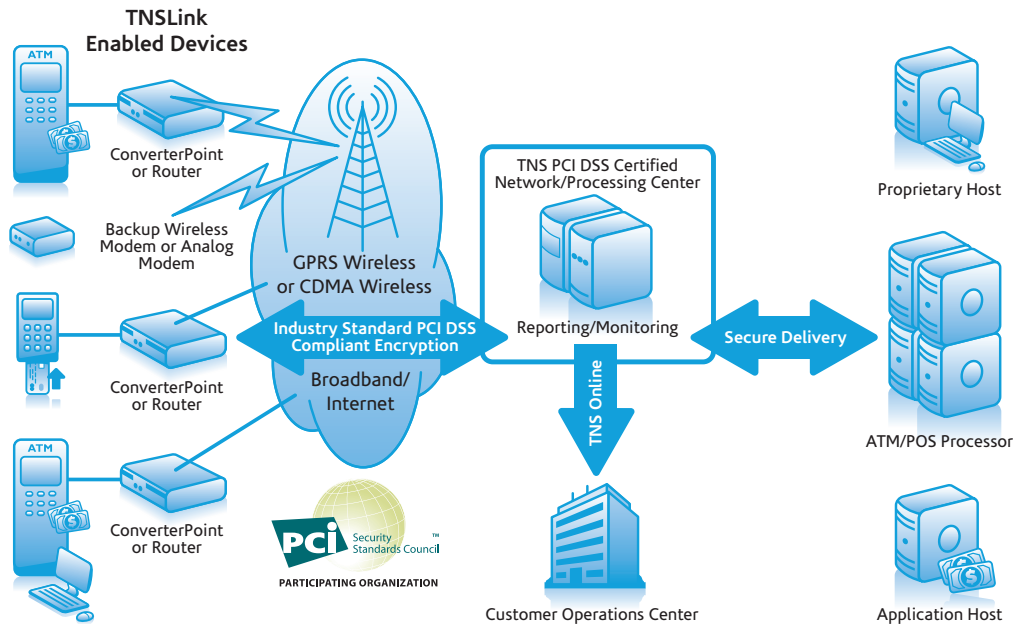

Transaction Network Services

Simple solution, powerful benefits

TNSLink works with a wide array of dial, serial and IP customer terminals - POS, ATM, and Kiosks - and supports wired and wireless broadband access methods. Customers choosing wired broadband access can also add back-up capabilities via a wireless or dial connection. TNSLink is the ideal cost-effective solution for organizations with multiple locations, a mixture of legacy and IP devices or unique communications environments. TNS simplifies your "day-to-day" by eliminating the need to deal with multiple vendors; TNS services include site pre-qualification, implementation support, equipment configuration and distribution, billing, Help Desk and problem resolution.

The most trusted partner for payments

Offering complete end-to-end solutions, TNS has built its reputation on delivering a suite of quality products and services that are ideally suited to the needs of our customers. Our expertise, combined with unique network technology and processing capabilities, has resulted in TNS becoming the preferred payments network provider around the world to processors, financial institutions, and merchants.

TNS is a proven leader in providing reliable and resilient network and payment services. Businesses large and small trust TNS to keep transaction networks of all sizes running smoothly and to deliver their transactions to their destination. The TNS network transports billions of transactions annually over its global PCI DSS certified backbone network that is monitored around the clock, 365 days a year.

About Us

Transaction Network Services (TNS) is a leading provider of fast, reliable and secure transaction-oriented services for the world's leading retailers, banks/processors, telecommunications companies and the financial markets. We combine innovation, advanced technology, experience and expertise to offer complete end-to-end solutions, allowing merchants of all types to maximize their communications investment and increase efficiency while reducing overhead and cost.
