

TNS FusionPoint Lite

Reduce costs and improve transaction time by utilizing IP technology to connect your existing dial ATM and POS devices

The TNS FusionPoint Lite solution enables ATM operators and POS terminal estate owners to migrate existing dial ATMs and POS terminals to broadband quickly, simply and securely. It incorporates the latest technology for high-speed, secure payment transaction transport to acquiring banks, processors and card associations and provides a simple, cost effective method for converting dial devices to IP.

Features

- **Flexible connectivity** - supports a broad array of ATM and POS devices and works with your existing broadband service. The solution can support two devices simultaneously enabling you to enhance your service without incurring additional communications costs
- **Secure communications** - ensures secure transport, utilizing strong SSL 3.0 encryption and industry best practices for handling sensitive card information
- **State-of-the-art technology** - utilizes the latest technology, enabling dial devices to work using broadband
- **TNS Online portal** - web interface provides you with near real time status and visibility across your entire estate
- **Added reliability with dial back-up** - if for any reason your broadband service is unavailable, the FusionPoint Lite solution will use any available telephone line to complete the transaction(s) until the broadband becomes available again

Benefits

Cost savings - FusionPoint Lite enables you to make savings on your monthly telephone line charges by removing the need for dedicated telephone line(s) for POS terminals or ATMs.

Convenience - Easy to install, FusionPoint Lite minimizes any business disruption at your site. TNS pre-configures the device for each location prior to delivery. And since you continue to use the same POS or ATM devices you always have, there is no need to spend time training your staff on new equipment.

Reduced risk - FusionPoint Lite employs SSL encryption technology and utilizes the PCI DSS certified TNS backbone network, providing high speed, secure transaction transport. The security aspects of the solution are designed to help you defend against hackers and data theft attempts.

Visibility - The TNS Online portal gives you the visibility you need to effectively monitor your payment operations. With near real time status and activity monitoring across your entire estate, you will have the control you need to proactively manage your payment device network.

Industry leading support - TNS provides you with help desk support 24x7x365. With a reputation built over nearly 20 years of experience in the payments industry, you can rely on TNS to provide you with the highest levels of support.

One Connection - A World of Opportunities

Transaction Network Services

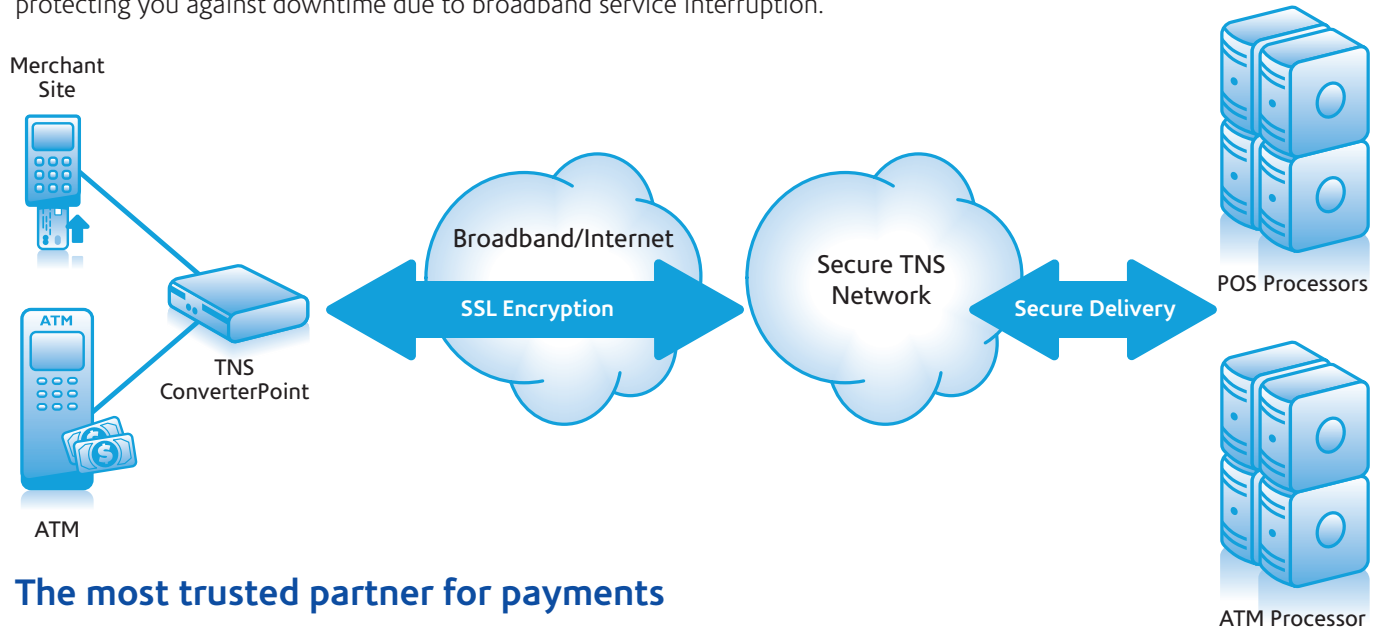

Simple solution, powerful benefits

The TNS FusionPoint Lite service includes an easy-to-install device that allows you to connect your in-store dial devices to your existing broadband service. Transactions will be routed over your broadband connection without interrupting applications on your location's PC or other broadband-based devices that are operating on the same connection.

This "plug-and-play" solution is ideal for POS or ATM estate owners who want to gain the benefits of an always-on broadband connection without the expense and disruption of replacing their existing equipment.

The solution eliminates exposure to lost transactions from sharing dial lines with fax machines, lottery equipment or telephones. In addition, it includes automatic dial back-up as a standard feature, protecting you against downtime due to broadband service interruption.

The most trusted partner for payments

Offering complete end-to-end solutions, TNS has built its reputation on delivering a suite of quality products and services that are ideally suited to the needs of our customers. Our expertise, combined with unique network technology and processing capabilities, has resulted in TNS becoming the preferred payments network provider around the world to processors, financial institutions, and merchants.

TNS is a proven leader in providing reliable and resilient network and payment services. Businesses large and small trust TNS to keep transaction networks of all sizes running smoothly and to deliver their transactions to their destination. The TNS network transports billions of transactions annually over its global PCI DSS certified backbone network that is monitored around the clock, 365 days a year.

About Us

Transaction Network Services (TNS) is a leading provider of fast, reliable and secure transaction-oriented services for the world's leading retailers, banks/processors, telecommunications companies and the financial markets. We combine innovation, advanced technology, experience and expertise to offer complete end-to-end solutions, allowing merchants of all types to maximize their communications investment and increase efficiency while reducing overhead and cost.
