

TNS Secure SSL Gateway

Secure, cost-effective payment solutions for IP transactions

Secure SSL Gateway is a PCI DSS compliant payment delivery solution for IP-based transactions. It is a payment transaction only SSL gateway offering ultra-high availability, redundant access points, 24x7x365 support and a seamless migration path for acquirers and ISOs to ensure IP transactions are securely and reliably delivered to their processing hosts.

Features

- **Dedicated SSL gateway** - unlike other solutions, TNS' SSL Gateway was uniquely designed for secure delivery of payment transactions, not general Internet traffic
- **Protocol and message conversion** - provides optional IP to X.25 conversion, as well as other protocol conversion; eliminating the need to make changes to your processing host
- **Online management reporting and configuration portal** - near real-time reporting and customer configuration management of SSL traffic provides you with visibility into your transactions
- **Host isolation** - our managed service and secure network physically isolate your host from DDoS attacks, attempted hacking, malicious connectivity and fraudulent terminal activity
- **Optional services** - customized capabilities such as DDoS Protection, Terminal White/Black listing, Pre-shared Key Authentication and X.509 Client Authentication can be delivered based on your requirements

Benefits

Highly redundant and available - Multiple, diverse gateways with high capacity interconnectivity provide redundant availability and dynamic alternate routing capabilities. We provide a 24x7x365 service that is available to your business even in the face of Internet service degradation and malicious hacking/service disruption attempts.

PCI compliance - The TNS Secure SSL Gateway is configured to meet global standards. Our purpose-built gateway and payment industry expertise provide the capability for higher levels of security specific to IP-based payments.

Help desk support - TNS network professionals are available 24x7x365. With nearly 20 years of experience in the payments industry, you can rely on TNS to provide you with the highest possible levels of support.

Flexibility - TNS understands that each client has specific network and security requirements. Our experienced engineers will work with your internal network team to provide rapid, seamless integration that meets your business requirements.

TNS Online - Increased visibility allows you enhanced control of your payment operations. TNS Online provides you with a single management information source in near real-time across both SSL and dial based transactions.

One Connection - A World of Opportunities

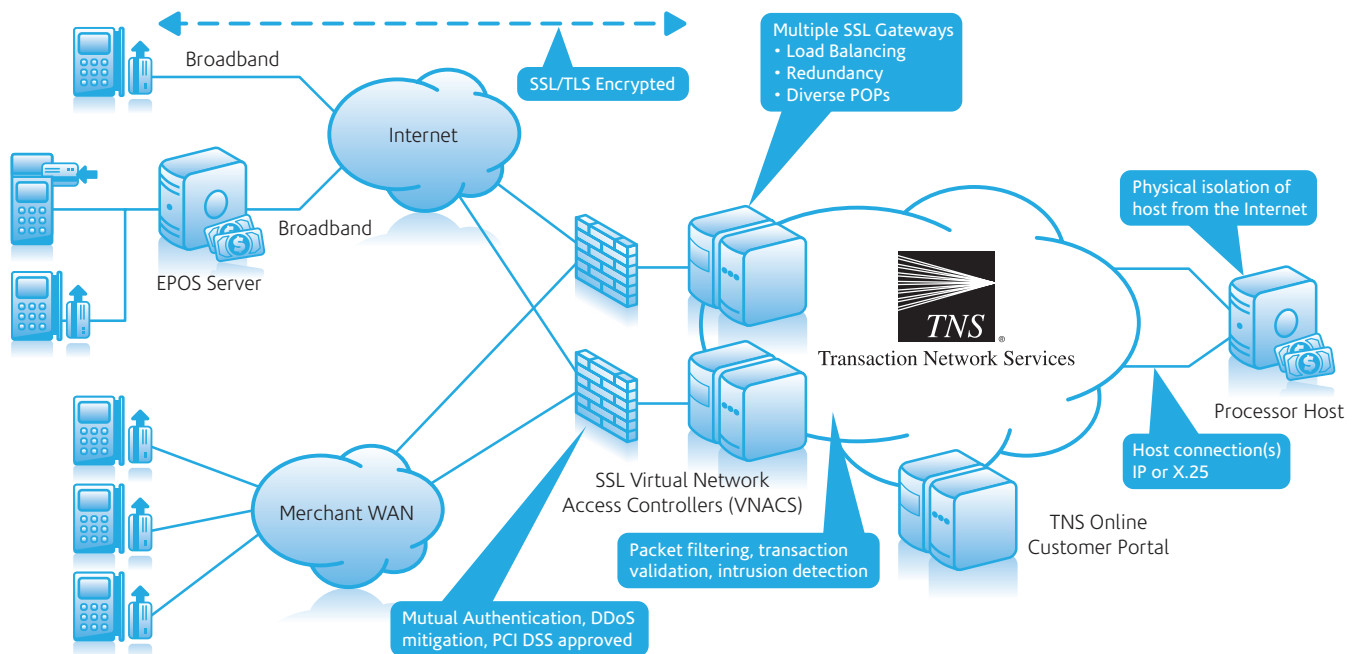

Transaction Network Services

Simple solution, powerful benefits

Effectively manage your exposure to IP payment security risks while lowering your overall costs

IP transactions are faster, less expensive and provide additional processing options. However, they open your host platform up to hacking, rogue terminals, denial of service attacks and other security issues. These potential threats must be closely managed to prevent potential financial loss and damage to your organization's reputation. TNS' Secure SSL Gateway provides a cost-effective, fully managed, security solution that protects your organization from these increasingly common threats at a lower cost than developing, testing and maintaining a comparable in-house solution.

Evolving solution to meet PCI DSS and card scheme standards, local mutual authentication and certificate policies

A dedicated team of payment security experts continually focus on the evolving industry requirements and security changes related to payments. We analyze and assess these issues every day to determine the most effective way to address them so you don't have to spend your valuable time dealing with them.

Managed by payment industry experts

We have established expert support and development teams that constantly strive to provide 100% network availability. It is our objective to provide you with world class support for mission critical areas of your business. Few, if any, can match our level of support and expertise.

About Us

Transaction Network Services (TNS) is a leading provider of fast, reliable and secure transaction-oriented services for the world's leading retailers, banks/processors, telecommunications companies and the financial markets. We combine innovation, advanced technology, experience and expertise to offer complete end-to-end solutions, allowing merchants of all types to maximize their communications investment and increase efficiency while reducing overhead and cost.

Contact TNS at 866-523-0661 to learn how you can secure your IP transactions from the point of sale to ingress at your host environment.
