

WELCOME TO TRANSACT

Welcome to another edition of our Transact newsletter.

The security of payments transactions and associated cardholder data remains a critically-debated subject and we're excited to be speaking at Money20/20 later this month on this very important issue. In partnership with Intel, we are working to encourage organizations to take a more holistic approach to protecting the flow of payment data and go beyond the requirements of PCI DSS. If you are attending the event I hope you can join us.

If you have any questions on any of the topics raised in this edition of the newsletter please contact your account manager or email solutions@tnsi.com.

Lisa Shipley

Executive Vice President and Managing Director
TNS Payment Network Solutions

TNS Commits to American Dial Market with Dual Diverse Network

TNS has launched a dual diverse network for its dial payments traffic, giving acquirers full redundancy and fail over capabilities through one supplier relationship.

The service, which is now live across the US and Canada, provides two different and distinct networks to carry dial payment transactions and utilizes multiple telecommunications firms.

Lisa Shipley, Executive Vice President and Managing Director of TNS' Payment Network Solutions, said: "We're delighted to be offering this service to acquirers across the US and Canada. Deploying alternative traffic across multiple routes provides vital resiliency and helps to ensure stability and continuity of service for consumers, but until now acquirers had to use different providers to meet this need. Today we're proud to be the first to offer this service under one roof."

Biometric Payments Take Center Stage

TNS has published a new video which gives a revealing insight into consumer attitudes to biometric payments.

The video charts some interesting findings from a survey commissioned by TNS among Australian, US and British adults, including

whether people are already embracing this new technology and what forms of biometric payment they might be willing to make in the future.
