

Xchange enews

Welcome to Xchange November 2016

We're delighted to bring you another edition of our newsletter which is bursting with the latest news and developments from TNS. The team is excited to have launched our new Managed Hosting, Co-Location and Connectivity Services and the TNS Secure Trading Hub, as well as given early previews of our cloud connectivity solutions.

A significant amount of work has been completed in the last few months to improve and strengthen our network and I hope you enjoy reading about some of these developments below.

If you have any questions on any of the subjects covered please email financial@tnsi.com or speak directly with your account manager.

Alex Walker
EVP & Managing Director, Financial Services Division

TNS Launches FIX Hub to Streamline Trading Globally

Traders using the FIX Protocol are being given access to a revolutionary new connectivity hub from TNS which allows multiple FIX connections to be established quickly and cost effectively. The TNS Secure Trading Hub is a fully managed, scalable and vendor agnostic FIX connectivity solution which supports order routing services for multi-asset classes.

Alex Walker said: "We have designed our low latency hub to eliminate the burden associated with setting up and managing multiple FIX connections. Buy and sell side firms, exchanges, alternative trading venues, trade reporting facilities and third party FIX networks all stand to benefit from this highly reliable and robust connectivity solution. By relieving a significant amount of complexity, our clients are free to focus on their core trading objectives."

The TNS Secure Trading Hub is end-to-end managed by TNS, giving it an edge over standard FIX hub vendors who typically outsource the network element.

Celebrating 2,000 Endpoints and 20 Years Serving the Financial Markets

This month, TNS is celebrating 20 years since it launched its Financial Services Division. Our Secure Trading Extranet, which was the first dedicated network for electronic trading, has now grown to connect over 2,000 endpoints across the Americas, Europe and Asia Pacific regions.

Over the years we have continually grown and invested in our secure and robust technology and now offer a range of additional solutions, including Managed Hosting, the Secure Trading Hub for FIX, cloud connectivity and cross connects. If you would like to know more about the full range of services we offer, please contact your account manager or email financial@tnsi.com.

TNS Featured in e-Forex Magazine

Alex Walker was recently interviewed by e-Forex magazine. The discussion focused on how networks with value added 'intelligent' services can create better opportunities, fewer risks and more efficient trading.

New Routes Streamline Connectivity and Reduce Latency

A series of new connectivity routes are being established and will be available from TNS shortly. These include a direct link between Tokyo Equinix TY3 and New York Equinix NY4 as well as a triangular configuration between Toronto, Chicago and New York. Your account manager will be in touch in due course to share further information.

Managed Hosting Now Live at FR2

TNS' innovative new Managed Hosting, Co-Location and Connectivity service, which launched earlier this year, is now available at the Equinix FR2 data center in Frankfurt as well as London LD4 and New York NY4.

Financial market participants wishing to establish ultra low latency connectivity with the strategically important German markets can now take advantage of this single source solution which reduces electronic trading infrastructure complexity. Please contact your account manager or email financial@tnsi.com if you would like to know

more about how TNS can assist with the procurement, staging and management requirements of connectivity at FR2.

FIX These Dates in Your Calendar

The TNS team will be present at the FIX Trading events in Boston on November 14th and Frankfurt on November 17th.

Alex Walker said: "We are looking forward to catching up with customers, contacts and the wider industry at these events. If you would like to meet up, please email financial@tnsi.com. We hope to see you there!"

New TNS Technical Product Manager

TNS is pleased to welcome Thiago Jose Pavesi as Technical Product Manager. Thiago brings a wealth of electronic trading experience to TNS, including time spent at XP INVESTIMENTOS, CM Capital Markets and ICAP, among others.

TNS' Endpoints List

Eligible companies can obtain a copy of our regularly updated endpoints list. If you do not currently receive a copy via email or from your account manager, please email financial@tnsi.com to see if you qualify.
